## 1. REVISION HISTORY

092805	Rev. 1.0	Original document.
052606	Rev. 1.1	Updated dimensions for T-bar and NonT-bar housings. Added screen shots.
102506	Rev. 1.11	Added PBIO option.
110606	Rev. 1.12	Corrected clip capacity

**Manual Version.....1.11 102506**  
**Document ID..... 4040CL-O\_User\_Manual.doc**

## *Getting Started . . .*

### **2. SYSTEM DESCRIPTION**

The 4040CL system includes DNF's most robust controller, the ST400, with Cliplist software. The ST400 controls up to 6 video channels individually or ganged. It features full transport functionality.

The 4040CL provides fast access to fill clip and key clip combinations with the press of one key.

The 4040CL-AMP supports AMP Broadcast protocol and requires that the Video Server be controllable under AMP Broadcast Protocol.

The 4040CL provides fast access to existing video clips stored in the Grass Valley Group PROFILE, the Leitch VR, and other Video Servers supporting AMP Broadcast Protocol.

### **DEFINITIONS**

- ❑ Throughout this document, DDR, VDR & Video Server will be referred to collectively as "Video Server."
- ❑ Words surrounded by brackets, for example, [ENTER], are keys on the ST400. [XXX] + [XXX] means hold the two keys down simultaneously.
- ❑ The 6 keys directly below the display are referred to as "Softkeys." Their function changes as indicated on the last line of the display: i.e. {GANG}

### 3. SYSTEM INSTALLATION

#### ST400-S/SM, VTR/DDR CONTROLLER

- a. Plug one end of a 9-conductor, RS422 serial cable into the VTR1 (VTR2, VTR3, VTR4, VTR5 or VTR6) connector on the rear of the ST400. Plug the other end of the cable into the 9-pin REMOTE connector on the Video Server.
- b. Connect the supplied POWER SUPPLY, APX#4108, into the POWER connector on the rear of the ST400. Plug the Power Supply into an outlet, 90 VAC - 240 VAC.
- c. Attach Video Ref. Cable (from house ref.) to Ref. Video IN on the rear of the ST400 to utilize the capture function or the gang function.
- d. Check SETUP MENU prior to using the ST400 to confirm proper Record mode and other User settable modes.

Installation is complete.

#### CONNECTION DIAGRAM

Rev 092805

## 4. VIDEO SERVER SETUP

- a. Select AMP communications protocol on the VIDEO SERVER to be controlled.
- b. Assign a serial port on the VIDEO SERVER through which the ST400 will control it.

In AMP mode, the VIDEO SERVER may **ONLY** allow Full Record. INSERT and ASSEMBLE record modes may be disabled.

Setup is complete

## 1. LOAD A CLIP

- a. Select a VTR by pressing VTR [1], [2], [3], [4], [5] or [6].
- b. Press [CLIP LIST] to view the list of CLIP IDs that are resident on the Video Server. The CLIP LIST indicator will turn on.
- c. Press [CREATE] to create and load a new clip.  
(Creating a clip is described in the CREATING A CLIP section.)

**OR**

Turn the Wheel to view the existing CLIP IDs on the video server.

Turn the Wheel clockwise to scroll forward, or counter-clockwise to scroll backward, through the list of available CLIPs. Backward scrolling is limited to the last 10 screens of CLIP IDs viewed.

**OR**

Manually enter a CLIP ID using the ST400 numeric keypad, or PC keyboard.

- d. Press [LOAD] to load the entered CLIP ID for playout.
- e. Repeat steps a. thru d. to load clips on desired VTRs.
- f. Set the Gang Mode, if required. See "GANG SETUP" in "FUNCTION TABLE" section.

## 2. LEARN A CLIP OR CLIP COMBINATION

### a. AMP PROTOCOL

- 1) Press VTR [1], [2], [3], [4], [5] or [6].
- 2) Load a clip on the selected channel. See section LOAD A CLIP.
- 3) Use the transport functions to view the clip.

Press **[IN]** to mark an IN point. The IN LED will turn on. On recall, the clip will cue to the IN time, not the beginning of the clip.

Optional- Press **[OUT]** to mark an OUT point. The OUT LED will turn on. On recall, the clip will play to the OUT point then stop.

To delete an IN or OUT point, press and hold **[DEL]**, then press **[IN]** or **[OUT]**. The IN/OUT LED will turn off.

If no IN point is marked, the current location of the clip will be learned as the IN point.

- 4) For GANGs, repeat steps a., b., and c. for each channel. Then, press the **[GANG]** softkey.

Press VTR [1], [2], [3], [4], [5] or [6] to add the VTR to the GANG. The VTR LED will turn on.

Press the VTR key again to remove it from the gang. The VTR LED will turn off.

Press **[ESC]** to exit GANG mode. The LED of all GANGED VTRs will turn on.

- 5) Select the desired Cue Point by pressing **[NEXT CUE]**, **[LAST CUE]** or by manually entering the Cue Point using the numeric keypad, followed by **[ENTER]**.

The selected Cue Point number is shown on the bottom part of the display.

- 6) Press **[SHIFT] + [MARK]** to initiate the Learn.  
The display will show: "Select VTRs to learn:-----"
- 7) Select the VTRs to be learned by pressing VTR keys [1], [2], [3], [4], [5], and/or [6].

- 8) Press **[MARK]** to complete the Learn process.  
**NOTE:** Learn will overwrite the previous contents of the Cue Point.

Press **[ESC]** at anytime to escape without LEARNing.

## **b. BVW PROTOCOL**

- 1) Select the desired Cue Point by pressing **[NEXT CUE]**, **[LAST CUE]**, or by manually entering the Cue Point using the numeric keypad.

The selected Cue Point number is shown on the bottom line of the display.

- 2) Locate the clip to the desired IN time. Press **[IN]** to mark the IN time.
- 3) Locate the clip to the desired OUT time. Press **[OUT]** to mark the OUT time.
- 4) Press **[SHIFT] + [MARK]** to start the LEARN.  
The first line of the display will show "Select VTRs:"  
The second line of the display will show "Mark-Lrn, ESC-cancel."
- 5) Press VTR**[1]**, VTR**[2]**, VTR**[3]** or VTR**[4]** to select the VTR to be learned into the current Cue Point.

If the VTRs are ganged, select one VTR that is part of the Gang. The rest of the Gang will learn automatically.

- 6) Press **[MARK]** to complete the LEARN.  
**OR**

Press **[ESC]** to exit without LEARNING.

The ST400 will: LEARN (save) the VTR number (1,2,3,4,5,6) and current IN & OUT time to the selected Cue Point.

## **3. RECALL A CLIP OR CLIP COMBINATION**

- a. Select the desired Cue Point by pressing **[NEXT CUE]**, **[LAST CUE]** or by manually entering the Cue Point using the numeric keypad.

The selected Cue Point number is shown on the bottom of the display.

- b. Press **[LOAD]** on the ST400.

The ST400 will automatically load the learned clips on the learned VTRs.  
Cue the clips to the learned IN time, then set the learned GANG mode.

## **4. RECUE CLIP**

- a. Press **[RECUE]**. If an IN Point is marked (the IN indicator is on), the clip will RECUE to the IN Point.

If the IN point is not marked, the clip will RECUE to the start of the clip.

- b. Press **{CUE OUT}** to cue to the marked OUT point.

## 5. CLEAR CUE POINTS

- a. Select the cue point to be cleared using [NEXT CUE], [LAST CUE], or manually entering the cue point number.
- b. Press [SHIFT] + [MARK].  
The {CLEAR} softkey will be displayed on the bottom of the display.
- c. Press the {CLEAR} softkey to clear the cue point. The cue point will be cleared and the display will return to the normal screen.

**OR**

Press [ESC] to escape without clearing.

## 6. LOOP CLIP

- a. Load the clip using CLIP LIST, or recall a cue point.
- b. Set an IN Point and/or OUT Point.  
Jog/Shuttle to the desired IN Point. Press [IN].  
Jog/Shuttle to the desired OUT Point. Press [OUT].

**OR**

Press [SHIFT] + [IN]. Manually enter the IN time on the numeric keypad. Press [ENTER].

Press [SHIFT] + [OUT]. Manually enter the OUT time on the numeric keypad. Press [ENTER].

- c. Press [RECUE] to assure that clip is parked within IN and OUT points.

**NOTE:** To loop the whole clip, do not enter IN/OUT.

- d. Press [LOOP ENABLE]. The clip will immediately start looping.

**NOTE:** If the clip ID ends with an asterisk (“#”), it will automatically loop when either [LOOP ENABLE] or [PLAY] is pressed.

## 7. PLAY CLIP SEGMENT

**NOTES:** Clip must first be loaded per [Section 5] or recalled per [Section 7].

- a. Set an IN Point and OUT Point.  
Jog/Shuttle to the desired IN point. Press **[IN]**.  
Jog/Shuttle to the desired OUT point. Press **[OUT]**.  
**OR**  
  
Press **[SHIFT] + [IN]**. Manually enter the IN time on the numeric keypad. Press **[ENTER]**.  
  
Press **[SHIFT] + [OUT]**. Manually enter the OUT time on the numeric keypad. Press **[ENTER]**.
- b. Press **[RECUE]**. The clip will cue to the IN point.
- c. Press **[PLAY]**. The clip will play from its current time to the OUT point, then stop.

## 12. TIMECODE SEARCH

- a. Press **[SHIFT] + [RECUE]**.
- b. Enter the desired timecode number on key pad.
- c. Press **[ENTER]** to search to time code number.  
**OR**  
Press **[ESC]** to exit search mode.

**NOTES:** In order to properly search by Timecode, please set Timecode = NOT SUPPORTED menu option for every channel connected to the Profile and Timecode = SUPPORTED for all other channels.

To select “Timecode” option:

- a. Press **[MENU]** key.
- b. Turn the wheel until TIMECODE option is highlighted.
- c. Press **{CHANGE}** softkey.
- d. Press a softkey to select SUPPORTED or NOT SUPPORTED setting.
- e. Press **[ESC]** twice to exit menu mode.

## 13. BVW MODE

If you wish to control a tape machine or a DDR with the 4040CL-O system, select control MODE=BVW (see Setup Menu section). In this mode, the media is accessed by timecode, not by clip names. The cuepoints in BVW mode consist only of IN point, OUT point and Gang information.

The following functions are not available in BVW mode:

- Vie Clip ID
- Recue Clip
- Loop Clip
- Capture
- Create Clip

All other functions work as described in the manual.

## *Advanced Features . . .*

### **14. CREATE A CLIP**

- a. Press **[CLIP LIST]**.
- b. Press **{CREATE}**. The display will show the default CLIP ID.
- c. Press **[LOAD]** to accept the default CLIP ID.  
**OR**

Manually enter an ID with a maximum of 32 characters from the ST400 numeric keypad.

**OR**

Manually enter an ID with a maximum of 32 characters from a PC keyboard.

- d. Press **{CREATE}**. The clip will be created and loaded.

If the entered CLIP ID already exists, a warning message will be displayed. To load the existing clip, press **[ENTER]**. Press **[ESC]** to exit without loading the existing clip.

## 15. CAPTURE

This function allows clips to be recorded onto the Video Server from a video source (SOURCE) such as a VTR. The SOURCE is connected to the VTR6 connector on the rear of the 4040CL-O.

Prior to performing a capture, press **[MENU]**.

Set the PREROLL value for the SOURCE VTR. Typical value is 5 seconds.

Set the RECORD DELAY value. This is the record latency of the video server. Typical value is 3 (frames).

- a. Select the destination server channel. The destination channel may be any VTR except VTR6.

- b. Press VTR **[6]** to initiate the Capture function.

- c. Set an IN point on the SOURCE VTR.  
Jog/Shuttle to the desired IN point. Press **[IN]**.  
**OR**

Press **[SHIFT] + [IN]**. Manually enter the IN time on the numeric keypad. Press **[ENTER]**.

- d. Set an OUT point on the SOURCE VTR.  
Jog/Shuttle to the desired OUT point. Press **[OUT]**.  
**OR**

Press **[SHIFT] + [OUT]**. Manually enter the OUT time on the numeric keypad. Press **[ENTER]**.

- e. Press **[SHIFT + RECORD]**. The display will prompt for a CLIP ID.  
Manually enter a CLIP ID (maximum of 32 characters) using the numeric keypad, or PC keyboard.

Press **{CREATE}** to accept the entered CLIP ID.

The SOURCE VTR will preroll to its IN point, then play. The video server will start recording at the SOURCE's IN point and stop recording at the SOURCE's OUT point.

The created clip will be loaded on the destination channel.

## 16. CREATE CUE POINT LABELS

Use LABELS mode to assign meaningful names to cue points. LABELS provides a faster and easier method to select cue points.

### ON THE ST400

- a. Select cue point to label.
- b. Press the [**LABEL**] key.
- c. Manually enter a label, up to 12 characters in length, using the numeric keypad, or PC keyboard.
- d. Press the [**ENTER**] to assign the entered label to the selected cue point.

**OR**

[**ENTER**] on the PC keyboard.

**OR**

[**NEXT CUE**] or [**LAST CUE**].

**NOTE:** Labels are saved in non-volatile memory in the ST400. They are not saved in the video server.

## 17. CREATE A SUBCLIP

- a. Load a clip as described in Section 5, **LOAD A CLIP**.
- b. Mark (enter) an IN and/or OUT point. Note: At least one point has to be marked in order to create a subclip.
- c. Press **[SHIFT] + [CLIPLIST]**.
- d. Enter a new clip name using a PC keyboard or a numeric keypad.
- e. Press **{CREATE}**.
- f. The new clip is created in the working directory. The new clip has entered name. It's SOM is the IN point (if the IN point was marked; otherwise, it's the SOM of the original clip), and EOM is the OUT point (if the OUT point was marked; otherwise, it's the EOM of the original clip).

## 18. SELECT A WORKING DIRECTORY

- a. Press **[MENU]** key.
- b. The Working Directory Option shows the currently selected working directory.
- c. Turn the wheel until this option is highlighted.
- d. Press **{CHANGE}** softkey.
- e. A Window with the list of directories residing on the server is displayed.
- f. Turn the wheel to highlight the desired directory.
- g. Press **[LOAD]** to make the highlighted directory your current working directory.  
**OR**  
Press **[ENTER]** to manually enter the directory name.
- h. Press **[ESC]** to exit menu mode.

NOTE: When **[CLIPLIST]** is pressed, the clips that reside in the working directory are selected.  
NOTE2: When a clip is recalled from a cuepoint, the directory that this clip resides in becomes the current working directory.

## 19. VIEW COUNTDOWN TIME

- a. Press **{RT}** softkey to enable the countdown mode on the current channel.
- b. The countdown time is displayed on the first line of the display. The countdown time is the remaining time till the OUT point, or, if the OUT point is not marked, till the end of the clip.
- c. If the OUT point is marked and the playout continues passed the OUT point, the negative countdown is displayed.
- d. Press **{RT}** softkey to disable the countdown mode on the current channel.

NOTE: When RT mode is selected, the IN and OUT point are still marked in either TM or LTC mode, depending on which mode is selected by [TIME MODE] key.

## ***Options . . .***

### **1.PBIO**

#### **PBIO ENABLE/DISABLE**

Press the **{PBIO}** softkey to enable or disable PBIO. When disabled, the ST400 will ignore all Pbus commands. When enabled, the ST400 will respond to all Pbus commands.

When enabled and Pbus commands are received, the softkey's LED will flash.

#### **PRODUCTION SWITCHER PBIO TRIGGER VALUES**

The Production Switcher outputs a Peripheral Bus trigger at specific Timeline key frames, as programmed by the operator. The 2044CL performs a specific function for each trigger value:

### **Grass Valley Group Production Switcher**

<b><u>Trigger Value</u></b>	<b><u>Mode</u></b>
0	Play (if OUT point is specified, stop at OUT, if clip ends with "*", Loop Play)
1	Recue to beginning of clip
2	Slo-mo using ST400 Preset Speed
3	Reverse Play
4	Still Frame
5	Loop (Odetics mode only)
6	Record
7 or greater	Play

### **Sony Production Switcher**

<b><u>Trigger Value</u></b>	<b><u>Mode</u></b>
0	Recue to beginning of clip Play
1	Play (if OUT point is specified, stop at OUT, if clip ends with "*", Loop Play)
2	Slo-mo using ST400 Preset Speed
3	Reverse Play
4	Still Frame
5	Loop (Odetics mode only)
6	Record
7 or greater	Play

To control more than one VTR, enable the Peripheral Device Address for each VTR. The Trigger value will be sent to the enabled devices.

#### **OR**

GANG the required VTRs on the ST400. See FUNCTION TABLE for GANG instructions. Enable the Peripheral Device Address for one of the GANGed VTRs. The Trigger will be sent to the enabled VTR. The other VTRs in the GANG will perform the same action.

## 21. SETUP MENU

Press [MENU]. The MENU indicator will turn on.  
The display will show the following parameters with their current settings.

Turn the wheel to select a menu option.  
Press the {CHANGE} softkey to modify the current setting.

Press the {EXIT} softkey to exit the Setup Menu.

<u>PARAMETER</u>	<u>DESCRIPTION</u>
<b>PROTOCOL</b>	Set each channel as required. Select {AMP} or {BVW}.  {AMP} Select AMP if controlling GVG M-series.  {BVW} Select BVW to control video server like a VTR. In this mode, the clip must have already been loaded.
<b>STANDARD</b>	Press {NTSC}, {DF}, or [PAL] to select the video standard for time calculations.
<b>WIND MODE</b>	Press Softkey to select: {HOLD} (fast wind is maintained only while key is depressed.) <b>OR</b> {LATCH} (fast wind is maintained after key is released.)  Set the fast wind speed (3.9 to 23.7) by pressing the {SPEED} softkey. Set each channel as required.
<b>RECORD MODE</b>	Set each channel as required. Press softkey to select to select the desired record mode: {Lockout}, {Crash} (Full).

<b>SLOMO</b>	<p>Press the <b>{TBAR}</b> (or <b>{WHEEL}</b>) softkey to select the T-bar or wheel for slomo.</p> <p><b>For T-bar:</b>  The T-BAR has a speed range of 0 → 2x with a detent at 1x play speed  <b>OR</b> a range of 0 → 1x (detent at 1x Play speed).</p> <p>Press <b>{SPD-RNG}</b> softkey to toggle between SLOMO speed ranges:  0 → 1x <b>OR</b> 0 → 2x.</p> <p>Press <b>{BACK}</b> softkey to return to SLOMO MENU.</p> <p>Press <b>[ESC]</b> to exit <b>OR</b> turn the Wheel to select another item.</p> <p><b>For Wheel:</b>  Press the <b>{PRSET}</b> sofkey to toggle between UPDATE and STATIC modes.</p> <p>UPDATE; When exiting SLOMO mode, the last used speed is saved in the Preset Speed register.</p> <p>STATIC: The Preset Speed register is NOT updated when exiting SLOMO mode.  It is only changed by <b>[SHIFT] + [SLOMO]</b> (PRESET SLOMO).</p> <p>Press <b>{SPD-RNG}</b> softkey to toggle between SLOMO speed ranges:  0 → 1x <b>OR</b> 0 → 2x.</p>
<b>RECALL MODE</b>	<p>Press <b>{NORMAL}</b> or <b>{REDIRECT}</b>.</p> <p><b>{REDIRECT}</b>  When one and only one clip is learned into a Cue Point, the Clip will be REDIRECTED to load on the currently selected VTR</p> <p><b>{NORMAL}</b>  The cue point will load on the learned VTR.</p>
<b>GANG MODE</b>	<p><b>{PERM}</b> Permanent Gang-  The GANG can be created and undone only with the <b>[GANG]</b> softkey.</p> <p><b>{TEMP}</b> Temporary Gang-  Quickly create a GANG by pressing and holding a VTR key, then pressing other VTR keys.  Quickly undo the GANG by pressing any VTR key.</p>
<b>RECORD DELAY</b>	Enter delay value. (Used by CAPTURE function.)
<b>PREROLL</b>	Enter Preroll value.
<b>DESTINATION CHANNEL SELECT</b>	<p>Select <b>[VTR1]</b>, <b>[VTR2]</b>, <b>[VTR3]</b>, <b>[VTR4]</b>, or <b>[VTR5]</b> to be the destination (recorder) channel for Capture Function.  <b>[VTR6]</b> cannot be selected.</p>

<b><u>PARAMETER</u></b>	<b><u>DESCRIPTION</u></b>
<b>REF. VIDEO</b>	Select the appropriate softkey to enable or disable the reference video <i>{ON}</i> , <i>{OFF}</i> .
<b>TIMECODE</b>	Set each channel as required. Select <i>{NOT SUPPORTED}</i> to have TC search on the GVG profile servers, or <i>{SUPPORTED}</i> for all other servers.
<b>WORK FOLDER</b>	Displays the currently selected Working folder. Refer to Section 22 for instructions on how to change the working directory. (Always set to Default in Odetics) Not applicable in BVW mode.
<i>{SERVICE}</i> <b>SOFTKEY</b>	<i>{DEFAULTS}</i> Set ST400 to factory defaults. Follow the prompts on the display.  <i>{CLEANUP}</i> Deletes all cue points. Follow the prompts on the display.  Press <b>[ENTER]</b> to continue or press <b>[ESC]</b> to exit without changing ST400.
<b>PBIO OPTION ONLY</b>	
<b>PB ADDRESS</b>	Select <b>[VTR1]</b> , <b>[VTR2]</b> , <b>[VTR3]</b> , <b>[VTR4]</b> , <b>[VTR5]</b> , or <b>[VTR6]</b> .  Assign Pbus Device Address to selected VTR by entering an address between 0 and 23. Or, press DEL to clear the Pbus Device Address.
<b>PB SWITCHER</b>	Select <i>{ GRASS VALLEY}</i> or <i>{ SONY}</i> Production Switcher. For Philips, use Grass Valley.
<b>PBIO PARITY</b>	Press <i>{ NONE}</i> , <i>{ ODD}</i> or <i>{ EVEN}</i> parity to match the Pbus setting on your Production Switcher.
<b>LEARN CLEAR</b>	Press <i>{ON}</i> , <i>{OFF}</i> . <i>{ON}</i> will clear the IN and OUT points for the loaded clip after the clip has been "learned" into a cue point.

## 22. FUNCTION TABLE

Function	Key Press	Description
CUE TO OUT POINT	{ <i>CUE OUT</i> }	If OUT point is marked, cue to the OUT point.
FFWD	[FFWD]	Press and HOLD to shuttle. Release key to stop. Set WIND Speed in MENU.
GOTO ENTERED TIME	[SHIFT] + [RECUE]	Search the VTR to the manually entered time.  Use the ST400 numeric keypad. Press [ENTER] or [RECUE].
GANG SETUP	{ <i>GANG</i> }	Individually press the VTR keys to be included in the gang. The LED above the key will turn on. Press the VTR key again to remove from gang. The LED above the key will turn off. Press [ESC] to exit.  Upon exiting, all members of the gang will have their VTR LEDs turned on. The flashing LED shows which VTR is currently selected.
JOG	[JOG]	Select JOG mode and enable Wheel.
LAST CUE	[LAST]	Step to the previous Cue Point Location.
LOOP	[LOOP ENABLE]	Plays the currently loaded clip in a continuous loop.
NEXT CUE	[NEXT]	Step to the next Cue Point Location.
RECORD	[REC]	Places VTR into the Record mode selected by RECORD MODE in the SETUP MENU. Press [SHIFT] + [RECORD].
REWIND	[RWD]	Press and HOLD to shuttle. Release key to stop. Set WIND Speed in MENU.
SHUTTLE	[SHUTTLE]	Select SHUTTLE mode and enable Wheel.
SLOMO	[SLOMO]	Press [SLOMO] to slo-mo the VTR. Turn the Wheel (or move the T-Bar, if available) to change the play speed. Press [SLOMO] to STILL frame <b>OR</b> press any transport key to exit SLOMO.
SLO-MO SPEED PRESET	[SHIFT] + [SLOMO]	For WHEEL ONLY: Press [SHIFT] + [SLOMO] to preset the slo-mo speed. Turn the Wheel to select desired speed. Press [ESC] or any transport key to exit.
STOP	[STOP]	Press once to STILL frame VTR. Press again to put VTR into STOP mode.

Function	Key Press	Description
TIME MODE SELECT	[TIME MODE]	Press to toggle between Timecode (TC), VITC (VT) or Tape Timer (TM) display modes.
PLAY	[PLAY]	If an OUT point is marked, play to the OUT point and stop. If not OUT point is marked, play normally.  If the CLIP ID ends with a '#', do loop play.
PLAY- SIMPLE	[SHIFT] + [PLAY]	Play to end of clip, not Out Point.
RECUE	[RECUE]	If the IN point is marked, cue to the IN point. If IN point is not marked, cue to the beginning of the clip.  (Under BVW protocol, no action occurs if the IN point is not marked.)
<b>PBIO OPTION ONLY</b>		
PBIO ENABLE/ DISABLE	{PBIO}	PBIO LED is ON if PBIO is enabled. Toggle the key to temporarily disable all PBIO signals. The key blinks when a valid PBIO command is received from the Production Switcher.

## **26. DNF CONTROLS LIMITED WARRANTY**

DNF Controls warrants its product to be free from defects in material and workmanship for a period of one (1) year from the date of sale to the original purchaser from DNF Controls.

In order to enforce the rights under this warranty, the customer must first contact DNF's Customer Support Department to afford the opportunity of identifying and fixing the problem without sending the unit in for repair. If DNF's Customer Support Department cannot fix the problem, the customer will be issued a Returned Merchandise Authorization number (RMA). The customer will then ship the defective product prepaid to DNF Controls with the RMA number clearly indicated on the customer's shipping document. The merchandise is to be shipped to:

DNF Controls  
12843 Foothill Blvd., Suite D  
Sylmar, CA 91342  
USA

Failure to obtain a proper RMA number prior to returning the product may result in the return not being accepted, or in a charge for the required repair.

DNF Controls, at its option, will repair or replace the defective unit. DNF Controls will return the unit prepaid to the customer. The method of shipment is at the discretion of DNF Controls, principally UPS Ground for shipments within the United States of America. Shipments to international customers will be sent via air. Should a customer require the product to be returned in a more expeditious manner, the return shipment will be billed to their freight account.

This warranty will be considered null and void if accident, misuse, abuse, improper line voltage, fire, water, lightning or other acts of God damaged the product. All repair parts are to be supplied by DNF Controls, either directly or through its authorized dealer network. Similarly, any repair work not performed by either DNF Controls or its authorized dealer may void the warranty.

After the warranty period has expired, DNF Controls offers repair services at prices listed in the DNF Controls Price List. DNF Controls reserves the right to refuse repair of any unit outside the warranty period that is deemed non-repairable.

DNF Controls shall not be liable for direct, indirect, incidental, consequential or other types of damage resulting from the use of the product.
